Agenda

Intro - Robert Product Roadmaps - PMs Sales - Jerod Marketing - Julie Q & A Closing Words - Robert

Core Values

Kudos

Big Picture Thinkers

Mike Chen - He has juggled many roles over the last few years and continues to see the big picture, helping to position Enconnex with major customers like Google, Juniper, and Pandora.

Individual Accountability

Jason, Cody, Brandon, Reniel, Shawn - Just one prime example of how individuals can show accountability is by volunteering for the tough jobs. Traveling on short notice to Hayward to build racks for Rahi and Google last month exemplifies this.

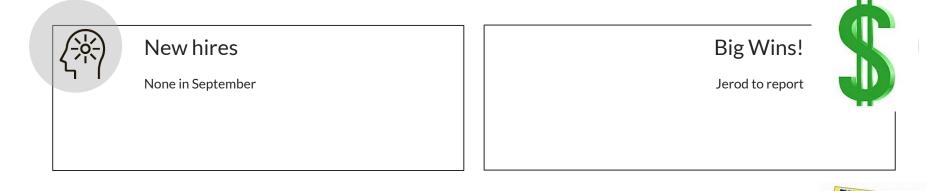

Jordan, Tyler, Brandon, Thane - The Spartans trained and ran in one of the toughest physical competitions around. Taxing their bodies and their minds to meet a goal as a team.

Work-Life Balance

Dave C - Always a top performer at work and also a top performer at play. Dave took 2nd place in his age group and 16th overall in the Vuelta a Honduras bicycle race. Congrats!

What's Happening at Enconnex?

News

Notices

- ISO Certified! Thanks everyone.
- Containment projects heating up
- Taking orders for urgent critical copper CAT6/6A - built in Reno

Heads Up!

E/C

PM and Engineering

New! Containment Product Line Launch

Results to date

- Leads: 154
- Opportunities: \$2.1 million
- Website visits: Up 207%
- Organic search: Now 40% of our traffic
 - What's working:
 - Organic and paid search
 - Biz dev cold calls & emails

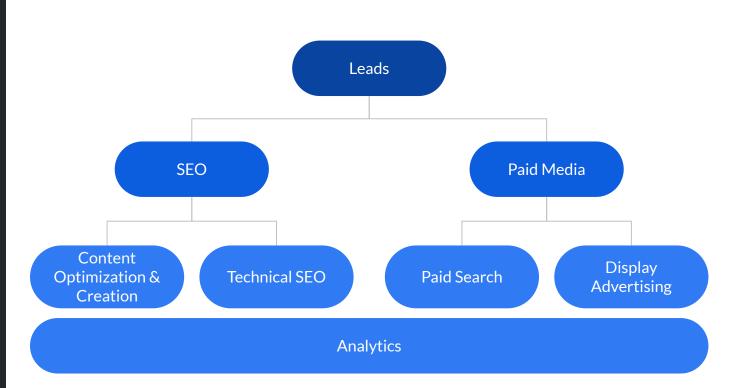

Q4: Where are we going?

- Build on the foundation we've put in place
- SEO is a HUGE priority
- Invest in paid campaigns (Google Adwords, Ads)
- Comarket with Partners
- New Campaigns: Cabinets, PDUs, DefenseShield, Power Cords
- Website: 2022 Revamp plan

What's Next?

More Detail:

Study groups and cheat sheets are our analytics infrastructure. The higher quality data we get, the more informed decisions we can make.

Our peers in the class are our competition in the marketplace.

The learnings from this class should be internalized and applied to future classes. SEO never stops, it evolves.

SEO & College, A Metaphor

Goal

Getting an "A" is akin to being ranked #1 on Google for relevant keywords like "server cabinets for sale". Leads to... more leads.

Professor & Student

Google's the professor and Enconnex is the student.

Coursework

Technical SEO is the coursework. Each assignment may not make a big difference individually, but the sum does. Websites with lots of errors are like term papers with typos.

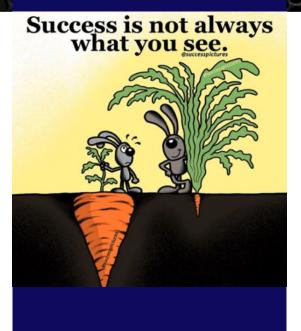

Exams & Quizzes

Content is our midterms and finals. To score well on a final, you need a thorough understanding of the curriculum. In SEO, you need a thorough understanding of what our visitors (and Google) want to see and how they want to see it.

Rome wasn't built in a day." - A French Person in 1190

And Now... The Details

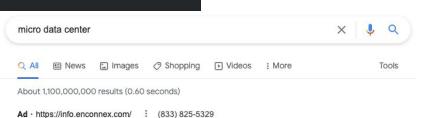

In Q3 we:

- Took inventory of website challenges and planned solutions..
- Content mapping. Targeted keyword rankings by page.
- Earned good rankings for DefenseShield and our blogs.
- Started optimizing product pages (Q3 campaigns).

Our focus in Q4 is the website's foundation.

- Bolster product pages with new, focused content.
- Focus on technical health (pagespeed, mobile-friendliness, errors).
- Continue using blog content to attract new visitors.
- Begin integrating the catalog site into the marketing and blog sites for a more seamless experience and better SEO performance.
- Analyze competitors and identify content gaps and opportunities.
